SUMMARY

DEDICATED AND MOTIVATED MCA STUDENT WITH A PASSION FOR SOFTWARE DEVELOPMENT AND PROBLEM-SOLVING. SKILLED IN JAVA PROGRAMMING, WEB DEVELOPMENT, AND DATABASE MANAGEMENT. EXCITED TO BRING MY FRESH PERSPECTIVE, ENTHUSIASM, AND CONTRIBUTE TO INNOVATIVE PROJECTS

PROJECTS

ALGORITHM VISULIZATION | HTML5, CSS3, JAVASCRIPT

- I have created an innovative algorithm visualization project featuring interactive graphics and animations, designed to simplify the understanding and learning of complex computer algorithms. .
- This educational tool facilitates a step-by-step visual representation of algorithms, enabling users to grasp their intricate processes with ease.

CHATBOT | PYTHON, DJANGO

- Chat bot answers like a human being. I have stored the answers to the user's questions and he answers them. Automated work flows and free up employees from repetitive task.
- Chat bot help in automating tasks are to be executed often and at a specific time. They help people increase productivity and save time.

AIRLINE WEBSITE | PHP, MYSQL

- I designed and developed a user-friendly airline website that simplifies the process of booking flights, checking flight schedules, and managing reservations..
- This website provides a seamless and convenient experience for travellers, making it easier for them to plan their trips and access essential information.

CRUD OPERATION | MYSQL

- Chat bot answers like a human being. I have stored the answers to the user's questions and he answers them. Automated work flows and free up employees from repetitive task.
- Chat bot help in automating tasks are to be executed often and at a specific time. They help people increase productivity and save time.

BOX CRICKET | PYTHON, DJANGO

- I designed and developed a user-friendly Box Cricket Booking web application, simplifying the reservation process for cricket grounds.
- Users can easily book venues, choose preferred time slots, and manage their reservations seamlessly through the web application.

LOAN CALCULATION SYSTEM | PYTHON

- I developed a loan calculation system that automates the process of determining loan amounts, interest rates, and repayment schedules.
- It means I can effectively work with databases and software systems to create new records, retrieve existing data, update information, and remove unnecessary data.
